(54) Title: HIGH RESOLUTION ATOM PROBE

(57) Abstract: An atom probe includes one or more intermediate electrodes between its local electrode and its detector, wherein the intermediate electrode(s) are charged to potentials such that they filter spurious ions and prevent them from reaching the detector, and/or adapt (focus) the flight cone of the ions to have a narrower or wider angle, thereby adjusting the magnification and field of view of the image provide by the atom probe. A preferred arrangement is to provide both filtering electrodes and focusing electrodes which are movable with respect to each other, and which may be telescopically interfit, so as to provide a range of filtering and focusing effects.

(54) Title: HIGH RESOLUTION ATOM PROBE

(57) Abstract: A three dimensional atom probe comprising a sharp specimen (10) coupled to a mounting means (12) where emission of charged particles is caused by application of a potential to the specimen tip (10) such that charged particles are influenced by filtering electrodes (206, 204) before impingement on a detection screen (202).

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/16590

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)		
This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:		
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:		
Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:		
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).		
Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)		
This International Searching Authority found multiple inventions in this international application, as follows:		
1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. 2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. 3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:		
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: Remark on Protest The additional search fees were accompanied by the applicant's protest.		
No protest accompanied the payment of additional search fees.
